

Wenatchee Valley Transportation Council
2011 Chelan-Douglas STP Regional Grant Program

Project Application Form

Project Title:	Fancher Field Road Overlay
Agency / Organization:	Douglas County Transportation and Land Services
Contact Person:	Douglas Bramlette, County Engineer
Phone Number & Email:	509.884.7173 dbramlette@co.douglas.wa.us

Project Financial Summary:	
Non-federal Match Funds:	\$ 55,091.36
Federal STP Funds Requested:	\$ 352,992.75
Total Project Cost:	\$ 408,084.11

Project Data:	
Length of Deficient Roadway Section:	0.71
Length of Proposed Improvement:	0.71
Current Functional Roadway Classification:	17
Roadway Traffic Count (avg. daily volume):	646
Is project already included in an adopted plan, CIP or TIP?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
If "Yes" above, please identify plan:	TIP (2011-2016) #10 In Plan
Local Agency Priority Rank * (e.g. 1 of 4)	1

* Only necessary if submitting multiple funding applications

Additional Project Information:

Please attach a separate Project Narrative providing a general overview of the project and need, including a project vicinity map. Project Narrative may not exceed 4 pages (single-sided 8.5" x 11") including map and photographs. If applicable, be sure to include the following information in the Project Narrative:

- Brief explanation of any legally-required ADA corrections included in the project.
- Brief explanation of any other additional, non-preservation project elements funded by additional matching dollars.
- Briefly describe recent history of any relevant preventative maintenance activities for this facility or roadway segment.

Ready-to-Proceed Assurance:

Signature by the Contact Person or other responsible official is required in order to signify understanding of the requirement that projects must be ready to proceed and under contract by December 31, 2012. STP funds may be rescinded by WVTC if not obligated and under contract within the required time frame.

Signature of Responsible Official

Fancher Field Overlay Project

Project Narrative:

Fancher Field Road was constructed as a detour road to serve the Fancher Plateau area while Badger Mountain Road was under construction. The existing Fancher Field Road paving is light bituminous surfacing that has provided traffic volumes of 4,700 ADT for two years (2006-2007). While the current ADT is down from that two year total, traffic modeling by the Wenatchee Valley Transportation Council shows that within the next decade, ADT is anticipated to quadruple once the Eastmont Extension project is complete in 2013.

The roadway received a preventative maintenance chip seal in 2007, however; it is in need of an overlay of 0.25' HMA for two 11' lanes with 4' shoulders. This area is growing with additional housing development planned in the future. Existing topography and road grade exceeds 9.5% and will not meet slope requirements for ADA. A separate paved pathway is required by Douglas County Comprehensive Plan and will be part of conditions of approval for developments along this roadway.

Attached are vicinity map (Attachment A), road section (Attachment B) and Engineer's Estimate.
